

Australian Tactiles & Braille

Product Data Sheet

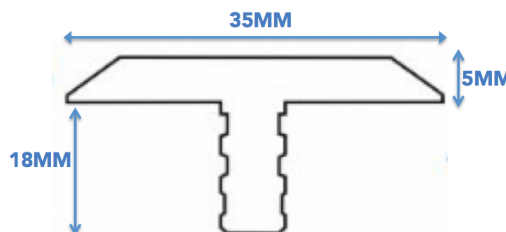

316 Marine Grade Stainless Steel Tactile Indicator with Black Polymer Outer

At ATB, our tactile indicators are machined from a single piece of 316 marine grade stainless steel. The outer polymer and stem is made from a UV material that does not deteriorate when exposed to direct sunlight. This ensures the highest quality product on the market and gives you confidence in its longevity and durability.

The stainless steel tactile indicators have been tested in a NATA Qualified Laboratory resulting in a P5 slip resistance rating.

Luminance testing can be carried out upon request.

Compliant with AS 1428.1
